# **Are Petting Zoos Dangerous for Kids?**

Kids love petting zoos. Especially little kids who are a lot more vulnerable to sicknesses than a teen or adult. "Good Morning America" did a little research to find out what type of bacteria live in petting zoos and how to prevent your kids from getting sick.

These hazy days of summer bring with them hot afternoons at the local fair.

For many kids, that means a trip to the petting zoo.

But how safe is it to get touchy-feely with the animals?

["Good Morning America"](#) did an investigation to find out what germs children are exposed to at petting zoos, and how to avoid bringing them home and getting sick.
