Optical Illusions and Visual Phenomena

Everybody loves a good optical illusion! This web site has tons of different types of optical illusions you can do. This web site also gives you instruction on how to do each illusion. Click on one of the links to check out these cool optical illusions!

These pages demonstrate visual phenomena, and »optical« or »visual illusions«. The latter is more appropriate, because most effects have their basis in the visual pathway, not in the optics of the eye. When I find the time I will expand the explanations, to the degree that these phenomena are really understood; any nice and thoughtful comment welcome.
